

PRISMA 2020 flow diagram for new systematic reviews which included searches of databases and registers only

Supplementary file 2

Note: Several studies had more than one exclusion criteria (e.g., study design, aim, and type of population studied), and were sorted according to the most important/overriding exclusion criteria.

- WA, Wrong aim: not designed to answer research question, or not relevant aim for this literature review.
- WD, Wrong design: cross-sectional and descriptive or comparative
- WO, Wrong outcome: do not include BC outcomes, or do not include sport practice specific outcome.
- WP, Wrong population: children, injured athletes, not athletes, disabled athletes, animals.
- WPT, Wrong publication type: consensus statements and similar
- D, Duplicate
